

Topic 1 Pathology and rehabilitation of structures

Structures are liable to be degraded over time by a wide variety of damage mechanisms, so it is necessary to have a deep knowledge of pathologies, diagnostic methods and, especially, the different methods and technics of management and repair. The lack of a real policy for the monitoring and maintenance of structures in our country encourages us to propose research aiming to understand the main actions in pathological structures degradation and thus propose the appropriate diagnostics and repair technics.

Topic 2 Seismic engineering of infrastructure

Seismic engineering is a field of engineering that aims to design and build structures capable of resisting the effects of earthquakes. Earthquakes are natural phenomena that can cause significant damage to structures and infrastructures. Development in this research field aims to improve the resilience of structures and infrastructures to earthquakes by using advanced numerical modeling technics, studying the properties of materials used in construction, and developing construction standards and regulations to guarantee the safety of structures. Seismic engineering aims to promote safe, sustainable construction, reduce earthquake damage and protect people lives.

Topic 3 Application of BIM technology in the infrastructure field

Building Information Modeling (BIM) is a revolution in technology in the building sector where it has proven itself throughout the life cycle of a building. This reality has led in recent years to an extension of this concept to the Civil Engineering sector and in particular for infrastructure projects. The common objective is to facilitate the exchange of data and collaboration around these projects between the various stakeholders. In this context, this research theme focuses on the integration of BIM technology in the context of infrastructures to increase efficiency at each stage of the life cycle of civil engineering projects.

Topic 4 Geomaterials and Environment

The main scientific challenges in civil engineering are essentially due to the interaction of two main fields: geotechnics and innovative materials (geo-materials). Experimentation, physical-chemical and mechanical analysis, and numerical modeling, from the scale of geo-materials to that of structures, are at the center of the various subjects treated in this thematic. Structures and civil engineering structures are at the heart of this field, with the development of eco-efficient materials, new soil improvement techniques to meet national economic and environmental requirements, ecosystem restoration, water resources management and infrastructure planning.

National Seminar

**New Technologies and Infrastructure
Development in Civil Engineering
Second Edition**

Hybrid

Sponsored by:

BET ROUAM SERIK Mohamed - Oran

In collaboration with the Faculty of Sciences and Technology (F.S.T) and Civil Engineering Department, the Laboratory Materials and Processes of Construction (LMPC) is organizing a National Seminar on New Technologies and Infrastructure Development in Civil Engineering, on November 12th, 2026 at Site 1 of Sciences and Technology Faculty, Abdelhamid Ibn Badis University, Mostaganem.

Speakers from all disciplines interested in the seminar themes are invited to respond to this call by submitting an article in French or English in Word or PDF format of 04 to 06 pages maximum (see [Template](#)) via the following link:

Submission Form and Registration

Seminar topics are:

Topic 1: Pathology and rehabilitation of structures

Topic 2: Seismic engineering of infrastructure

Topic 3: Application of BIM technology in the infrastructure field

Topic 4: Geomaterials and Environment

Conference chairman

Dr. ZELMAT Yassine UMAB – Mostaganem.

IMPORTANT DATES

Paper Submission : 08/15/2026 to 09/10/2026

1st acceptance notification : 09/15/2026 to 09/20/2026

2nd acceptance notification : 10/04/2026 to 10/08/2026

Registration & confirmations : 10/11/2026 to 10/15/2026

Registration Fees:

Status	Face-to face	Virtual
Students	3000 DA	2000 DA
Teachers Researcher	6000 DA	4000 DA
Professional	10000 DA	

Scientific Committee

President : Pr. KADRI Tahar UMAB – Mostaganem.

Members :

Pr. ARAB Ahmed UNIV – Chlef

Pr. BAHAR Ramdane USTHB – Alger

Pr. BELAS Nadia UMAB – Mostaganem.

Pr. BENSOUA Mohamed UMAB – Mostaganem.

Pr. BOUHAMOU Nesr - Eddine UMAB – Mostaganem.

Pr. BOURDIM S. Amine CU – Maghnia

Pr. DELLA Noureddine UNIV – Chlef

Pr. DJEDID Abdelkader UNIV – Tlemcen

Pr. EZZIANE Mohamed ENP – Oran

Pr. KENAI Said UNIV – Blida

Pr. LAREDJ Nadia UMAB – Mostaganem.

Pr. MALIKI Mustapha UMAB – Mostaganem.

Pr. MEBROUKI Abdelkader UMAB – Mostaganem.

Pr. MISSOUM Hanifi UMAB – Mostaganem.

Pr. RAHAL Driss USTO – Oran

Pr. SALHI Mohamed UNIV – Relizane

Pr. SARDOU Miloud UMAB – Mostaganem.

Dr. ADDOU Farouk UMAB – Mostaganem.

Dr. BAHAR Sadek UMAB – Mostaganem.

Dr. BELBACHIR Nesrine UMAB – Mostaganem.

Dr. CHEMAM Mohamed UNIV – Relizane

Dr. MENAD Kamel UNIV – Relizane

Dr. SAFER Omar UNIV – Relizane

Dr. ZAOUI Mohamed UMAB – Mostaganem.

Organization Committee

President : Dr. BOUHALOUFA Ahmed UMAB – Mostaganem.

Members :

Pr. BENSOUA Mohamed UMAB – Mostaganem.

Pr. MALIKI Mostafa UMAB – Mostaganem.

Pr. MEDJAHED Bendida UMAB – Mostaganem.

Pr. SARDOU Miloud UMAB – Mostaganem.

Dr. AARIZOU Merieme Lalia UMAB – Mostaganem.

Dr. ADDOU Farouk UMAB – Mostaganem.

Dr. AYAD Tayeb UMAB – Mostaganem.

Dr. BAHAR Sadek UMAB – Mostaganem.

Dr. BELBACHIR Nesrine UMAB – Mostaganem.

Dr. BELGUESMIA Khalil UMAB – Mostaganem.

Dr. ELMASCRI Setti UMAB – Mostaganem.

Dr. FARES Zineb UMAB – Mostaganem.

Dr. GUERZOU Tourkia UMAB – Mostaganem.

Dr. HEBBAR Imane UMAB – Mostaganem.

Dr. MEHALA Tewfik UMAB – Mostaganem.

Dr. MEKAIDECHE Khalfallah UMAB – Mostaganem.

Dr. MOSTEFA Fouzia UMAB – Mostaganem.

Dr. REZIGA Ahmed UMAB – Mostaganem.

Dr. SABEUR Bendehiba UMAB – Mostaganem.

Dr. ZAOUI Mohamed UMAB – Mostaganem.

Dr. ZELMAT Yassine UMAB – Mostaganem.

Mme. BEMHAMED N/Elhouda UMAB – Mostaganem.
