1. Introduction and objectives

The introduction should briefly present the study in a broad context and explain why it is important. The purpose of the work and its importance should be defined. The current state of the research field needs to be carefully considered and the main publications cited. Please highlight controversial and divergent assumptions when necessary. Finally, mention the main purpose of the work and highlight the main conclusions. Whenever possible, ensure that the introduction is understandable to scientists outside your area of research. References must be numbered in the order of appearance and indicated by one or more numbers in square brackets, for example, [1] or

[2,3] or [4-6]. Please go down to the end of this document for more details on references.

2. Material and methods (Subjects and methods)

This section should be described in sufficient detail to allow reproduction and reliance on published results. Please note that the publication of your manuscript implies that you must make all materials, data, computer codes and protocols associated with the publication available to readers. Please disclose at the submission stage any restrictions on the availability of material or information. New methods and protocols need to be described in detail, while

well-established methods can be briefly described and appropriately cited.

Intervention studies involving animals or humans, and other studies requiring ethical approval, should list the authority that provided the approval and the corresponding ethical approval code.

3. Results

This section can be divided into subtitles. It should provide a concise and precise description of the experimental results, their interpretation and the experimental conclusions that can be drawn.

All figures and tables should be quoted in the main text as Figure 1, Table 1, etc.

Table1: Title of the first table

| An example of a column header | Column A (t) | Column B (t) |
|-------------------------------|--------------|--------------|
| An entry | 1 | 2 |
| Another entry | 3 | 4 |
| Another entry | 5 | 6 |

Figures and tables must be incorporated into the text and not provided separately. Tables should be placed in the main text near the first time they are quoted.

Table2: Title of the second table

| An example of a column header | Column A (t) | Column B (t) |
|-------------------------------|--------------|--------------|
| An entry | 1 | 2 |
| Another entry | 3 | 4 |
| Another entry | 5 | 6 |

(a)

(b)

Figure 1: Title of figure 1 (a) (b).....

This is a figure; the diagrams follow the same formatting. If there are multiple panels, they should be listed as follows: (a) Description of what is contained in the first panel; (b) Description of what is contained in the second panel. Figures should be placed in the main text near the first time they are cited. A single line legend must be centered.

4. Discussion

Authors should discuss the results and how they can be interpreted from the perspective of previous studies and working hypotheses. The results and their implications should be discussed in the broadest possible context. Future research areas can also be highlighted.

The files must be in Word (.docx) format. Please make sure that you use as many normal fonts as possible in your documents. Special fonts, such as

fonts used in the Far East (Japanese, Chinese, Korean, etc.) can cause problems during processing.

5. Conclusion

This section is not mandatory, but can be added to the manuscript if the discussion is unusually long or complex.

Acknowledgments

This section is not mandatory, but can be added to the manuscript.

Funding: Please add: "This research did not receive any external funding" or "This research was funded by NAME OF FUNDING, Grant # XXX" and. Check carefully that the information provided is accurate and use the standard spelling of funding agency names at <https://search.crossref.org/funding>. Any mistake can affect your future funding.

Acknowledgments: In this section you can recognize any support provided that is not covered by the author's contribution or funding sections. This may include administrative and technical support, or in-kind donations (for example, equipment used for experiments).

Conflicts of interest: Declare conflicts of interest or state "Authors do not declare any conflict of interest". Authors must identify and report any situation or personal interest that may be perceived as inappropriately influencing the representation or interpretation of the reported research findings. Any role of the funders in the design of the study; in the collection, analysis or interpretation of data; in writing the manuscript, or in the decision to publish the results must be declared in this section. If there is no role, please indicate "Donors have not played a role in the design of the study; in the collection, analysis or interpretation of data; in writing the manuscript or in the decision to publish the results".

6. References

References should be numbered in order of appearance in the text (including citations in tables and captions) and listed individually at the end of the

manuscript. We recommend that you prepare references with bibliography software, such as End Note, Reference Manager, or Zotero, to avoid typing errors and duplicate references. Include the Digital Object Identifier (DOI) for all references, if any.

Citations and references in additional files are allowed provided they are also in the list of references here.

In the text, reference numbers must be enclosed in square brackets [] and before punctuation; for example [1], [1-3] or [1,3].

1. Author 1, A.B.; Author 2, C.D. Title of the article. Abbreviated name of the journal **Year**, Volume, Pages.
2. Author 1, A.B.; Author 2, C.D. Title of the chapter. In Book title, 2nd ed.; Editor 1, A., Editor 2, B., Eds.; Editor: Publisher Location, Country, 2007; Volume 3, p. 154-196.
3. Author 1, A.B.; Author 2, C.D. Book title. 3rd Ed.; Editor: Publisher Location, Country, 2008; pp. 154–196.
4. Author 1, A.B.; Author 2, C. Title of the unpublished work. Name of the abridged journal stage of the publication (under revision, accepted, in press).
5. Author 1, A.B. (University, city, state, country); Author 2, C. (Institute, City, State, Country). Personal communication, 2012.
6. Author 1, A.B.; Author 2, C.D.; Author 3, E.F. Title of the presentation. Title of the combined work (if available), Acts of the name of the conference, place of the conference, country, date of the conference; Publisher 1, Publisher 2, Eds. (If available); Publisher: City, Country, Year (if available); Abstract number (optional), pagination (optional).
7. Author 1, A.B. Title of the thesis. Thesis level, University giving the degree, Location of the university, Completion date.
8. Title of the site. Available online: URL (consulted on the day month year).
