### **Congress issue:**

Sport represents an important tributary to the strengthening of relations between peoples, the establishment of peace and the reduction of conflicts in many parts of the world. It is also a mechanism for consolidating values, rejecting violence, extremism and spreading tolerance, in addition to being an important tool and a fundamental resource to support society's development efforts, and prepare generations, and its contribution to the empowerment of women, youth, individuals and societies, and the achievement of desired goals in the fields of health and education, and from this point of view, it is a mirror of society which reflects the present and the future of peoples.

Sport has proven to be a cost-effective and flexible tool in promoting the sustainable development goals. Since the entry into force of United Nations General Assembly Resolution 70/1 entitled "Transforming Our World: The 2030 Agenda for Sustainable Development" in 2015, sport has played a vital role in promoting all of the established goals, as stated in that plan, "Sport is also one of the important enabling elements for sustainable development," and explicit recognition of the growing contribution that sport plays in achieving sustainable development goals. .

Therefore, countries seek to host international sports games, and each of them puts in place a comprehensive and integrated plan to achieve the required sports infrastructure and infrastructure in accordance with international standards, and thus, they are fixed assets and investments for the country itself after the end of the sporting event.

On the other hand, foresight in the field of sports plays a major role in winning titles, as it allows, even in an approximate way, to set a training plan and clear goals for sports competitions, which is what must be worked on within the framework of the Mediterranean Games Oran 2022, as Algeria is the host country, great successes must be achieved for high-

level athletes. And work to make these achievements resonate widely, in order to sow competition among athletes to create innovative and effective sports models. The Mediterranean Games are not just a sporting event, but rather an occasion to raise the sporting performance, which has different repercussions on various fields, such as sports facilities, real estate, tourism, cultural, economic and social; the fact that sport is a common factor between different sectors, if it is exploited well, we will be able to create an individual with a healthy, intellectual, moral, cultural and professional profitability, including the achievement of sustainable development goals.

### **Congress objectives:**

This forum coincides with Algeria's organization of the nineteenth edition of the Mediterranean Games Oran 2022, and although it will be organized in the state of Oran, it is an event that all Algerians must make successful, which we will work on, from our part in coordination with the Preparatory Committee for the Mediterranean Games to achieve the following goals:

- Creating a space for intellectual exchange between the various actors in the sports field,
- Highlight the importance of Algeria's organization of the 2022 Mediterranean Games in Oran,
- Study the results of elite athletes and sports' management and strategies,
- Study of the most important basic requirements for the success of organizing major sporting events.
- Studying the impact of organizing major sporting events on sustainable development.
- Encouraging elite athletes to create model designs for elite athletes,
- Upgrading the level of sports training,

Ministry of Youth and Sports

Ministry of Higher Education and Scientific Research

- Strengthening cooperation between scientific research laboratories and sports federations,

### **Congress Axes:**

- 1- The first axis: methods, strategies and models in organizing major sporting events
- 2- The second axis: factors for upgrading elite sports and modern models of physical performance for elite athletes in team and individual games and fighting sports
- 3- The third axis: sports and sustainable development
- 4- The fourth axis: the economic, social, political and cultural returns for organizing sports events
- 5- Fifth axis: Media and communication strategies in promoting major sporting events and the repercussions of organizing the Mediterranean Games on various sectors
