abdelhamid ibn badis mostaganem, kharouba (Algeria)

The Symposium Problematic:

In an era marked by technological diversity and global development, the world has witnessed significant advancements often referred to as the era of globalization. This has led individuals to extend beyond their immediate environments, entering a larger world fraught with various threats and challenges due to technological progress.

Recently, the term "intellectual security" has gained prominence among intellectuals, each emphasizing its significance in societal life and its interconnectedness with various components of social interaction. The concept emerged with the advent of intellectual and ideological influences propagated by modern technological means, such as networks and online platforms. This phenomenon has raised alarms regarding the influx of foreign cultures that threaten social values and norms, challenging cultural and social identities. Consequently, it represents a rebellion against cultural identity and social privacy, posing a threat to social order. Therefore, the concept of cultural security has become an essential prerequisite for achieving life security among individuals, linking it to various other forms of security, including the social one. Thus, it functions as a mechanism to attain psychological well-being, assurance, and stability, serving as a crucial instrument for achieving social welfare.

Notably, intellectual security has transcended its status as a mere academic concept confined to research and scientific forums. The concept has become a societal reality shaped by life circumstances, development requirements, and globalization. This has imposed a form of intellectual invasion resulting in cultural assimilation, value detachment, and a state of normlessness within societies. This endeavour aims to construct ideas, fortify minds, and safeguard values and social standards. Therefore, the intellectual security concept is a crucial necessity for evaluating behaviour, ensuring social cohesion, solidarity, and integration.

Given the significance of this concept as a fundamental principle in the construction of societies and ensuring their coherence and integrity, intellectual security emerges as a guiding principle for the protection of human thought. Upon achieving this, various forms of security are attained, encompassing social, political, economic, environmental, and nutritional dimensions. This advancement propels society towards attaining the highest levels of progress, as it enables the adoption of sound principles of thought for its members and the realization of a secure life for them.

To effectively achieve intellectual security in societies, concerted efforts are required from all societal institutions and systems, with socialization institutions at the forefront. This involves cultivating individuals to uphold the integrity of their thought and shielding them from any form of alienation that may impact their personalities and behaviours. Consequently, this ensures the stability and protection of their acquired values within societal culture, preserving its social constants and identity.

Recognizing the paramount importance of intellectual security within societies, we have enhanced the conference agenda with specific themes aimed at fostering the exchange of perspectives, ideas, and orientations across diverse disciplines. The primary objective is to collectively explore strategies addressing the challenges posed by cultural and intellectual invasions, focusing on investigating effective mechanisms for achieving intellectual security in contemporary societies.

Objectives of the Conference:

- ◆ 1. Framing the concept of intellectual security and determining its relationship with similar concepts (human security, food security, health security, economic security, and social security).
- ◆ 2. Discussing the concept of intellectual security from different perspectives and angles.
- ◆ 3. Linking the concept of intellectual security to the social framework.
- ◆ 4. Diagnosing the various challenges and threats facing society and its institutions in achieving intellectual security.
- ◆ 5. Researching mechanisms and prospects for achieving intellectual security in societies, focusing on protecting the youth from cultural invasions.

Recommended topics

Suggested topics for papers include but are not limited to the following:

01. The first axis: Concepts of Intellectual Security: Attempts to Define the Concept (human security, food security, health security, economic security, and social security).

- Intellectual security from a social perspective.
- Intellectual security from a political and legal perspective.
- Intellectual security from a dogmatic and religious perspective.
- Intellectual security from a media perspective.
- Intellectual security and its relationship to other security concepts (human security, food security, health security, economic security, social security).

02. The second axis: Duality of Intellectual Invasion and Intellectual Security

- Threats of cultural invasion to societies in all fields (cultural, religious, social, etc.)
- Threats of cultural invasion to intellectual security
- Intellectual security between incoming cultures and cultural identity

03. The third axis: Threats of Cyberspace Media and Intellectual Security.

- Dangers of social media to society.
- The impact of cyber media on intellectual security.
- The role of cyber media in spreading incoming cultures.
- Cyber media and the impact on youth.

04. fourth Axis: Intellectual Security and the Value System.

- Role of intellectual security in maintaining the value system.
- Role of the value system in promoting intellectual security.
- Society between the concept of intellectual security and cultural globalization.
- Social media and the value system.

05. Fifth axis: Socialization Institutions and Achieving Intellectual Security in Society.

- Role of the family in promoting the concept of intellectual security among its members.
- Role of the school in promoting the concept of intellectual security (programs, curricula, textbooks, educational family...).
- The mosque and its role in spreading the concept of intellectual security in society.
- Pillars of the media in achieving intellectual security.

06. Sixth axis: Challenges Facing Societies in Achieving Intellectual Security

- Social challenges.
- Political challenges.
- Intellectual challenges

07. The seventh axis: Mechanisms for Achieving Intellectual Security in Societies

- Determine educational and cultural mechanisms.
- Restructure regulatory and value mechanisms.
- The law and the role of justice in establishing intellectual security in society.

08. The eighth axis: Experiences of Developing Countries in Achieving Intellectual Security (Field Studies).

Participation requirements and deadlines

The proposed papers shall be presented in the form of Word according to the attached formal regulations and sent in the form of an attached file within the deadlines to the electronic address of the forum : colloque2025@gmail.com and zerhounifaiza@yahoo.fr

Registration rights:

categories	On- site		Remote	
	Inside the country	Outside the country	Inside the country	Outside the country
professors	4000 DA	80 EUR	2000 DA	40 EUR
students	free	20 EUR	free	15 EUR
professionals	3000 DA	60 EUR	2000 DA	30 EUR

- ⦿ fees will cover (on-site): the conference portfolio, the brochure, participation certificate, and publishing the conference activities in a book.
- ⦿ fess will cover(remote): the brochure, participation certificate, and publishing the conference activities in a book.
- ⦿ **The university takes charge of lodging and feeding for participants, while transportation fees will be paid by participants inside or outside algeria.**

Deadlines:

- January 1, 2024: conference's announcement.
- December 31, 2024: Abstract deadline.
- January 15, 2025: Notification of acceptance.
- June 15, 2025: Submission of full papers.
- July 15-20, 2025: Feedback sent to the speakers.
- The conference is expected to be held on December 10th- 11th, 2025.

The formal Criteria of Participants' interventions:

- Interventions can be edited in one of the languages : Arabic, French or English in a range of **15 pages**.
- The font for Arabic entries is **Simplified Arabic size 14**, and for French and English entries is **Times New Roman size 12**.
- The Abstract should not exceed **150 words** and should be accompanied with key words which do not exceed **10 words**.
- The references should be attached to the end of the article and should correspond to the drafting standards displayed in the following way:
- The author, the title of the reference in italic, the name of the translator in case of translated work, the name of the publisher, place of publication, edition if found, year of publication and finally the page.

The references retrieved from the net should be displayed in this way:
