

Instructions for Paper Preparation and Submission for CNMI 2014

First A. Author¹, Second B. Author² and Third C. Author³
 First and Second Author Affiliation, Third Author Affiliation

Abstract — These instructions give you guidelines for preparing papers for CNMI2014. Use this document as a template if you are using Microsoft Word. Otherwise, use this document as an instruction set. Define all symbols used in the abstract. Do not cite references in the abstract. Do not delete the blank line immediately above the abstract; it sets the footnote at the bottom of this column.

Keywords — Key words or phrases in alphabetical order, separated by commas.

I. INTRODUCTION

THE purpose of the introduction is to present background information for the work with literature references, and possibly to outline the organization of the paper. In section II the requirements for the format of the papers are discussed.

This document is a template for Microsoft Word. This document is available at www.univ.mosta.dz so you can use it to prepare your manuscript.

Papers to be submitted for CNMI2014 could include both expert and scientific articles containing original applicable or theoretical results of researches, of interest for a broad group of experts engaged in the field the article deals with. The authors are welcome to submit the articles comprising the applications of theoretical methods in solving specific engineering problems, presentations of new equipment and systems, results of experimental research, new realizations of familiar solutions, etc.

The authors are requested to submit only those papers whose contents have not been notified, published or in any other way presented at any time prior to the Conference. The papers should contain original scientific, expert or applied results of the authors themselves. The results included should in no way violate the rights of other authors or organizations. Although all papers will be reviewed, the authors themselves are responsible for the publishing rights, originality and quality of their papers.

The presentation of results of other authors or institutions, without a personal contribution or participation, as well as survey papers or tutorials, may be offered by participants for acceptance or can be invited by the Program Committee. In such a case it is obligatory for

the authors to obtain all the necessary permissions and to clearly state all the sources used.

French or Arabic language. Each participant can be represented three times at most either as author or as co-author of an original paper. The papers will be accepted for reviewing if they are: (a) received on time, and, (b) strictly prepared in accordance with the instructions for authors. The instructions are the same for paper submission for the review process, and for camera-ready versions. The instructions are meant to be taken literally for the final paper submission, to ensure high quality of the proceedings.

The authors' papers sent for CNMI2014 will be subject to reviewing. The anonymous reviewers are appointed by the Program Committee. After reviewing the authors will be informed whether their papers are accepted or rejected. The accepted papers will be presented in oral or poster sessions. Only papers with a favorable review of the reviewers will be accepted, presented during the Conference and published in the CNMI2014 Proceedings, provided that the registration fee is settled.

By submitting the paper, the authors are accepting all the rules listed in the invitation.

II. PAPER SUBMISSION

Papers for the review process are submitted electronically on-line at cnmi.mosta2014@gmail.com. In the submission process the paper is to send in the PDF format.

Deadline for the submission is **Sep 20, 2014**. Authors will be notified about the acceptance or rejection of their paper not later than **Oct 30, 2014**. The **deadline** for receiving of camera-ready papers in the PDF format is **Nov 20, 2014**.

III. PREPARATION OF PAPERS

A. Paper Format

Please strictly follow this specification when preparing the final version of the manuscript. Papers not complying with it (especially in layout geometry and typesetting) will not be included in the proceedings

B. Page layout

The paper should be composed using the A4 paper size (210 mm x 297 mm). The left and right margins should be 19 mm, while the top and bottom margins should be 20 mm.

The paper should be set in **two columns** with 5 mm column separation. Please, equalize the length of the columns on the last page.

Please respect the maximum number of pages (not more than **6 pages**). Pages should be without page numbers.

C. Typesetting

All paragraphs should be indented 3.6 mm.

Times New Roman 10 pt font should be used for normal text in the body of the paper.

D. Title and author name(s)

The paper title and the author names appear on the first page and should be set centered across the full page width. The title is set in 24 pt size. The author names appear below the title in 11 pt size, normal face. The complete affiliations of the authors should be set as symbol-tagged footnotes in the first column of the paper.

E. Abstract

The paper should start with an abstract giving a short overview on the discussed matter and the presented results. Abstract should be about 50 words. It should not exceed 15 lines. The abstract should be set in 9 pt font for abstract and 9 pt *italic* font for the word “Abstract.”

F. Section headings

Regular paper may be divided in a number of sections. Section titles (including references and acknowledgement) should be typed using Times New Roman 10 pt font in the SMALL CAPS option, centered. For numbering use Roman numerals.

The subsection headings appear in 10 pt *italic* font. They are aligned on the left of a column. Sections and subsections are numbered using Arabic numerals.

G. Figures and tables

Figures and tables should be placed as close as possible to the text where they are first referenced to. Figures should be numbered in the order of appearance in the paper. Figures should be positioned within a single column or they can span two columns. In the latter case they should be placed at the top of a page. Place figure captions below the figures; place table titles above the tables. The captions are centered within a column. If your figure has two parts, include the labels “(a)” and “(b)” as part of the artwork. Please verify that the figures and tables you mention in the text actually exist. Use the abbreviation “Fig.” even at the beginning of a sentence. Do not abbreviate “Table.” Tables are numbered with Roman numerals. Table caption should be written using Times New Roman 9 pt SMALL CAPS font.

TABLE 1: PAGE LAYOUT DESCRIPTION.

<i>Paper size</i>	<i>A4</i>
Top margin	20.0 mm
Bottom margin	20.0 mm
Left margin	19.0 mm
Right margin	19.0 mm

H. Copyright Form

Fig. 1. It is good practice to explain the significance of the figure in the caption.

IV. HELPFUL HINTS

A. References

A list of references should appear at the end of the paper as a separate unnumbered section. References should be listed in the order of appearance in the paper. Use square brackets for the reference list and when referring to references in the text. The sentence punctuation follows the brackets [2]. Multiple references [2], [3] are each numbered with separate brackets [1]–[3].

When citing a section in a book, please give the relevant page numbers [2]. In sentences, refer simply to the reference number, as in [3]. At the beginning of a sentence use “Reference [3] shows”

Please note that the references at the end of this document are in the preferred referencing style. Give all authors’ names. Papers that have not been published should be cited as “unpublished” [4]. Papers that have been accepted for publication, but not yet specified for an issue should be cited as “to be published” [5]. Papers that have been submitted for publication should be cited as “submitted for publication” [6]. Please give affiliations and addresses for private communications [7].

Capitalize only the first word in a paper title, except for proper nouns and element symbols. For papers published in translation journals, please give the English citation first, followed by the original foreign-language citation [8].

B. Abbreviations and Acronyms

Define abbreviations and acronyms the first time they are used in the text, even after they have already been defined

in the abstract.

C. Equations

Equations are centered within columns. They may have a reference number placed on the right. The reference number should be enclosed in parentheses. For example

$$\int_0^{r_2} F(r, \varphi) dr d\varphi = [\sigma r_2 / (2\mu_0)]. \quad (1)$$

Larger equation must be split in multiple lines.

$$ML_\gamma = \prod_{i=1}^v \prod_{j=1}^{q_i} \frac{\Gamma(\alpha_{ij})}{\Gamma(\alpha_{ij} + n_{ij})} \prod_{k=1}^{c_i} \frac{\Gamma(\alpha_{ijk} + n_{ijk})}{\Gamma(\alpha_{ijk})} + \prod_{i=1}^v \prod_{j=1}^{q_i} \frac{\Gamma(\beta_{ij})}{\Gamma(\beta_{ij} + n_{ij})} \prod_{k=1}^{c_i} \frac{\Gamma(\beta_{ijk} + n_{ijk})}{\Gamma(\beta_{ijk})} \quad (2)$$

Be sure that the symbols in your equation have been defined before the equation appears or immediately following.

D. Other Recommendations

Use one space after periods and colons. Hyphenate complex modifiers: “zero-field-cooled magnetization.” Use a zero before decimal points: “0.25,” not “.25.” When expressing a range of values, write “7 to 9” or “7-9.”

A parenthetical statement at the end of a sentence is punctuated outside of the closing parenthesis.

V. CONCLUSION

A conclusion section is not required. Although a conclusion may review the main points of the paper, do not replicate the abstract as the conclusion. A conclusion might elaborate on the importance of the work or suggest applications and extensions.

APPENDIX

Appendixes, if needed, appear before the acknowledgment.
