

### The problematic of meeting:

There is no doubt that the information revolution that was the hallmark of the twentieth century has resulted in an unprecedented development in the means of communication, and no secret to the role that the Internet has begun to play in changing much of the pattern of practical life areas from manual ones.(Physical) to the technological mode (material), that is, that virtual space The nature of the storage system - the messaging system - which is free from the requirements of mass settlement or physical concentration, which is based on digitization of information according to a binary method based on numbers zero and one, due to the enormous facilities provided by the timely interaction, proximity and non-compliance with geographical boundaries between States, reduction of time and the ability to deal remotely without the need for direct movement, communication and even recognition of the party.

To be crowned by the emergence of so-called electronic dealings.It has become an important requirement because of the many characteristics that this type of transaction provides to its parties, based primarily on the technical nature of the medium in which it takes place.

### Body overseeing the meeting

#### **Honorary President of the National**

**Meeting:** Mr. Director of University of  
MOstaganem

**National Meeting General Supervisor:** Dr.  
AbbassaTahar Dean of the Faculty of Law and  
Political Science

#### **Coordinator of the National Meeting:**

Dr.Zahdor Kaoutar

#### **President of the National Meeting:**

Dr. Bouker Rachida

#### **Chair of scientific committee:**

Dr .Bouzid khaled

#### **Chair of organizing committee:**

Dr Ouafi hadja

Abdel Hamid Ibn BadisUniversity - Mostaganem

## Main axes of the National Meeting:

In the light of the foregoing, and for the purpose of opening a constructive debate on the issue of the Forum, the proposed themes are as follows:

### First axis: Conceptual and legal framework for electronic transactions

(Terms of electronic dealing, types of electronic dealing, evolution of electronic handling, electronic means of communication...).

### Second axis: Proof in electronic dealings in commercial; civil and banking materials

(Electronic signature, electronic certification system, electronic writing).

### Third axis: Proof in electronic dealings in penal matters

(The rules of procedure for the extraction of digital evidence, the power of the penal judge to accept and value the digital evidence, the evidentiary power of the digital evidence in the civil material necessary for the determination of the criminal proceedings...).

### Fourth axis : challenges to electronic evidence in electronic transactions and the requirements of the legal system, to overcome them.

However, the transition from paperwork to digitization has opened up arguments about the validity of electronic transactions, and the question of the validity and reliability of digital evidence has been raised at the proof level in both civil and criminal material. As long as traditional transactions have a well-established legal system, electronic transactions and evidence rules are not sufficiently established.

On the other hand, the prosperity of these types of transactions depends on their being conducted in a legal environment that guarantees security and protects the rights and freedoms of their parties with a fence of protection in the light of the illegal practices to which they may be subjected. However, the detection of these types of crimes requires electronic methods commensurate with their specificity.

Hence the problem of this scientific *forum in researching the existing legal and judicial system regarding the extent to which it establishes electronic transactions and the reliability, validity and strength of digital evidence in the area of electronic transactions?*

**Participation form:**

The participation form contains the following information:

Name and surname:.....

Degree:.....

University Institution:.....

Telephone numb.....

Intervention title:.....

The focus of the intervention:.....

Summary of intervention:.....

**Conditions and dates of participation:**

1. It should be one of the main themes of the meeting, and it should be serious and scientific;
2. Using the SAKKAL LAJALA ARABIC LANGUAGE LINE 14 with a marginalisation with the same 12-size font. Ada was searching in a foreign language (French, English), editing the entry in TIMES NEW ROMAN LINE 12, leaving a distance of 2.5 cm in the four sides of the page, no more than 20 pages and no less than 10 pages.
3. There cannot be more than two participants in one intervention.

**Last time to send the brief intervention**

**2022/04/20**

**. Last time to send the whole intervention.**

**2022/04/25**

**. Last time to send the whole intervention.**

**2022/05/15**

Note: **Interventions choose value for publication in a collective book.**

Summaries and interventions are sent through the following e-mail
